

Council Suggests Collection of School Taxes

To Lessen Costs to Ratepayers in Face of Increasing Taxes Each Year—Meeting to be Held With School Trustees.

A regular meeting of the council was held on Tuesday evening. Present Mayor Pattinson, Councillors White, Antrobus, Atkinson, Kerr and Balloch.

The result of action taken by local merchants during the past few weeks to try and secure a readjustment of taxes on stock from the school district was seen in a letter from the Department of Municipal Affairs. The letter clearly stated that the Department could not intervene and that the school board was quite within its rights. Next year property will be taxed on 100 per cent assessment instead of the two thirds of its value this year. In view of that fact the town instructed the secretary to arrange a meeting with the school board to see if they would combine the two offices. The town would then collect all taxes, town and school, which would be made on a more equitable basis than at present. The board was given the privilege of naming the date and hour of the meeting. The letter from the Department of Municipal Affairs was tabled.

Constable Antel recommended that a stable on Second street be moved outside of the town limits as it is a menace to the health of people in the neighborhood owing to its unsanitary condition, while a manure pile there is a breeding place for flies. Many complaints have been made and action will be taken to have the stable removed.

The council was informed that \$124 would be necessary to install lights into the Fred Smalek property by the Coleman Light & Water Co. The company however expected to have the lights into that residence before winter.

Constable Antel was instructed, that on the next visit of P.H.I. Butterworth, to have samples of water taken from all wells in West Coleman and a report given.

Electric light will be supplied to Mrs. Vollandorf. A motion to accept Mrs. Vollandorf as a town charge was defeated 3 to 2. The town claims that she is a provincial charge.

Steve Bettinger, overseer at the nuisance ground, stated that certain merchants were throwing stale meat on the dump and refusing to bury it, and that when he reprimanded them he received abuse. Constable Antel was instructed to secure the names of these merchants and take steps to see that they buried all stale meats in the future.

Constable Antel was authorized to use his discretion as to supplying Joe Kwannie with a load of wood.

The twelve months trial between Mrs. Rose and Claxton as medical health officers had expired this month and the council decided to terminate the contract.

A cheque for \$91.07 will be sent to the British Trust Company. This money is the result of relief recipients taking goods from the Big Corner Store, previously managed by Ed. Ledieu. The bills were presented to the council after Mr. Ledieu was in bankruptcy and were immediately claimed by the British Trust Co., executors of the bankruptcy proceedings. The above sum is the balance after arrears of taxes had been deducted from the original sum by the council.

The Coleman Journal's letter error in tax assessment was filed.

Councillor White, chairman of the Works and Property committee, reported that Salvador's tractor had been engaged to grade hills on Third and Fourth

Coleman Retail Merchants

Former Hospital Secretary to Face Charges

Reports from the police office here state that J. T. Griffiths, former secretary-treasurer of Coleman Miners' Hospital, will be brought back to Coleman from Vancouver on Friday, the Board having had a warrant issued for his arrest, on a charge of misappropriation of funds. A R.C.M.P. escort was sent to the coast city on Monday.

The former secretary lived here for many years, and was employed at McGillivray mine. He left here about a year ago to live in Vancouver. Mrs. Griffiths having moved there some months previously owing to ill-health.

Homing Society Notes

The third young Birds race was flown from Red Deer Aug. 19, with the following result.

1st. W. Pryde. 2nd. A. Zur. 3rd. A. Biegan. Prizes were donated by The Empire Hotel, Coleman. Mr. F. Celli, Creston and Mr. C. Sartoria, Blainmore. Ten torts completed with 115 birds.

The fourth young birds race was from Wetaskiwin on Aug. 26th, with the following result: 1st. A. Biegan. 2nd. C. Makin. 3rd. F. Beddington. Prizes were donated by Bowen's Hardware, Mr. J. S. D'Appollonia and another whose name is withheld at the donor's request. Nine lofts competed with 91 birds.

The next race will be under the auspices of the Western Canadian Federation and will be for the young birds championship of the Federation.

This race will be flown from Edmonton on Labor Day Sept. 4. Birds to be shipped on Sunday, Sept. 3rd.

LOCAL NEWS

Mr. D. H. McLean, general superintendent of Nova Scotia Steel Company's mines in Pictou County, accompanied by Mrs. McLean, returned to their home in Stellarton, N. S. on Wednesday afternoon. They have been visiting at the Coast cities and while in Coleman were the guests of Mr. and Mrs. J. O. C. McDonald.

Mr. and Mrs. C. D. Rogers, John and Helen, are enjoying two weeks vacation. They spent part of their holiday at Arrow Lakes, B. C. and are now spending the remainder at Calgary and Drumheller.

Mr. George Morgan is spending a few weeks holiday in Vancouver.

streets as well as the back alley running from the cemetery road to Geo. Brown's residence on Sixth street. The estimated cost of the work was \$350.00. This may be lowered, depending on the number of days required to complete the work. It had been expected to hard-surface the stretch of road on Third street but it was considered wise to let the new grade settled during the fall and winter and complete the hard surfacing next year.

SCHOOL AGAIN

WITH the re-opening of school on Monday morning following the mid-summer holidays, the familiar ring of the school bell is again heard at 8.45 and 9 a.m. and again at 1.15 and 1.30 p.m. The familiar sight of children hurrying to get in before the last tap amuses one, for there is always a last one—tardy scholar!

The teaching staff is the same as last year as follows: Mr. D. Hoyle, M. Sc., principal; Miss Allan, B.A., Mr. H. Allen, B.A., Mr. John McDonald, high school.

Central public school: Miss M. Clifford, Mrs. Gladys Thompson, the Misses Edith Hayson, Megan Jones, Edna Fairhurst, Katherine Milley, Ethel Wilson, Mildred Higginbotham, and Messrs. Ray Spillers, Steve Ondrus and Jim Cousins.

Cameron School: Misses A. Yuill, Ethel Dunlop, Margaret Dunlop and Laura Johnson.

Total enrolment of pupils is as follows: High school, 108; Central public school, grades 1 to 8, 386; West Coleman, grades 1 to 6, 115; making a total enrolment of 609.

EDITORIAL

ALL this prattling against a two-party system in government, and maligning of the old line parties, is so much gabble by those who have something infinitely worse to offer. We challenge anyone who has studied the history of Canadian political parties to show where a third party has achieved anything, except to try and exert minority rule by allying itself with one of the established parties.

Third parties usually propose to achieve their objective by means of threats, a noble example of which was seen in the attempts of the Social Credit government in its earlier stages to compel people to "co-operate" by means of signed covenants, which ultimately were apparently thrown into the waste-basket after considerable expense has been entailed. Again, there was the attempt to discredit prominent citizens of the province by the famous "Bankers Todies" pamphlet, which was a disgrace for any government to countenance, let alone our bible institute premier. It showed to what extremes this government would have gone had its wings not been clipped by the courts, and with which it attempted to interfere.

We quote from a weekly newspaper, The Guardian, of Verdun, Quebec, which states: "A political party is fundamentally the banding together of a group of people interested in advancing common principles and parliament is fundamentally a free institution where questions of the day are debated at length in order that the public be fully informed. The party system is the bulwark of freedom—there

is always an alternative to the party in power, ready to take office as soon as the government of the day loses the confidence of the people."

With the probability of an early provincial election, it is desirable, in fact vitally necessary, that a political party be ready to take up the reins of government, even if it be a fusion of all those opposed to the present government.

Leaders and members of both old-line parties are anxious to select candidates opposed to Atherism and Social Credit, therefore minor differences must be submerged if their objective is to be achieved. We agree that a political party to be effective must retain its identity, for when it merges with another party or movement it weakens its own position, but in the peculiar situation which confronts Alberta, with so many disillusioned people awaiting leadership, unity of purpose on the part of those who believe in the party system must be organized without further delay.

Tennis Players to Compete at Nelson Tournament

Four local tennis players, R. Shone, Dr. Aiello, Geo. Jenkins and W. Balloch will compete at the Nelson tennis tournament to be held on Labor Day weekend.

They have decided to pass-up the Lethbridge tournament which is being held on the same dates. Geo. Jenkins, present southern Alberta title holder, will not defend his title. Some of the younger players intend competing at Lethbridge and they may retain the title for Coleman.

NOTICE

Period of discount of 10% on current school taxes has been extended to September 8th, 1939.

G. LEES, Secretary.

John Kerr Buried at Blainmore on Friday

Many from Pass towns attended the funeral services of Mr. John Kerr of Passburg last Friday afternoon. The service at the house was read by Rev. R. Upton of Bellevue United church, assisted by Rev. John Wood of Hillcrest.

Reference was made to the unswerving loyalty of Mr. Kerr to the land from which he came and to his adopted country, and of his pride in race. Mrs. Upton sang two appropriate hymns, favorites of the deceased.

At the conclusion of the house service the casket was borne from the home where 33 years of deceased's life had been spent, among the hills he loved and in the streams of which he so often fished.

The funeral procession was delayed for some time in the Frank slide, owing to a mishap to the engine of the motor hearse, a small repair having to be rushed from Blainmore. At the graveside many friends assembled, where the committal service was read, and the body laid to rest beside that of Mrs. Kerr, who died in 1932.

In quiet and simple dignity the last farewells were said over the grave of one who by his life had typified true and loyal citizenship, and whose sterling qualities will be remembered by all who knew him in the Crows Nest Pass.

The pall-bearers were Robert Holmes, George Coupland, Charles Emmerson, Tom Duncan, G. Sutherland and R. Glover.

Bellevue Exhibition on Labor Day

President Wm. Kerr and Secretary Charlie Johnson extend a hearty invitation to the people of Coleman and district to attend the annual horticultural and poultry show at the Bellevue arena on Monday. It is the 22nd year this has been held, establishing a reputation which is province wide. The work of the society is highly commendable and the show is indeed worthy of public support.

LOCAL NEWS

Mr. and Mrs. Frank Becker of Nelson were visitors at the home of the latter's parents, Mr. and Mrs. Tom Higginbotham, during the week.

Miss Audrey Dunlop has left to teach school in the Medicine Hat inspectorate, and Hugh Dunlop has been appointed to a school at Cold Lake, Alberta.

Mrs. D. Davies and daughters of Edmonton, who have been the guests of Mr. and Mrs. Fred Cox, are visiting friends in British Columbia before returning to the city.

Your local weekly newspaper, The Journal, combined with The Bulletin, give you complete coverage. Without doubt they are THE BEST local advertising mediums. Impressions count on the public mind.

Pucksters Even Series With Turner Valley

Win 5-4 and 7-6 to Even Series—Marconi and Seaman Star—Deciding Game Next Sunday at Blainmore Stadium.

Coleman Pucksters, a fighting band of ball players who refuse to be beaten, came from behind in both games of a doubleheader on Sunday to win 5-4 and 7-6 to even their best three-out-of-five game series with Turner Valley at two games each. Turner Valley had won two games a week ago at the Valley. The fifth and deciding game will be played at Blainmore next Sunday afternoon at 2 p.m.

Both games were played on Blainmore's spacious ball park before crowds estimated at 500 or more. So great was the number of cars around the ball field that traffic was slowed to a crawl at the end of each game.

Marconi and Seaman were the real stars; both pitched a brand of ball that had the crowd rooting for them all the way. Marconi, in the first game, struck out fifteen men. He only had difficulty in the second and third innings when Turner Valley managed to score four runs.

From then on he was never in trouble and finished strong. Slugg played a hero's role in the sixth inning when he placed Bill Fields. He hit a triple his first time at bat and was responsible for one run. Bill Gate started the real uprising in the eighth inning with a triple, followed by Seaman who also hit for three bases. When the smoke had cleared Coleman had scored three runs and were out in front by one run. Marconi came through the last inning in convincing style to hold the fort.

Pucksters opened disastrously in the first inning of the second game when Turner Valley scored six runs to give them what appeared an insurmountable lead. Schnepf, who started for Pucksters, was unable to get control of the ball and was replaced by Jerry Seaman. Four runs were scored while Schnepf was on the mound and two others were scored before Seaman retired the side. Coleman managed to get one run in their first inning.

Seaman pitched sparkling ball, held the Oilers scoreless while Coleman whittled away at that six run lead. They managed to get two runs in the fifth inning to come within hailing distance at 6-3. In the seventh Beranek of the locals hit a terrific clout with two on to score two runs; Coleman kept up a hot barrage to score two more before the side was retired. Seaman, still pitching great ball, held his opponents scoreless to win 7-6. Following the final out, fans rushed on to the field to congratulate the players on their performance in overcoming a six-run deficit.

Turner Valley had expressed the opinion that they would default the series if they lost the second game, but changed their minds and are now scheduled to appear at Blainmore next Sunday at 2 p.m. Marconi is scheduled to pitch for the locals and a record crowd is expected to be on hand.

An Encouraging Report

Reports of substantial increases in motor tourist traffic to national parks in Western Canada this year, revealed in figures for the four months ending July 31, released by the Department of Mines and Resources at Ottawa, make welcome reading for all who are interested in efforts which are being made to widen the range of national income and of additional revenue for the people of the country.

A compilation of the figures published by the department indicates that the increase in patronage of motorists visiting these fine playgrounds of the west show considerable variations for the individual parks, but at some of the more popular resorts the increment over last year is as high as 35 per cent, and in one case well over 150 per cent.

A one-third increase is a very material augmentation and where the patronage runs into the tens of thousands it represents a very considerable increase in the amount of money brought into, and put in circulation in the country, when the fact is taken into consideration that, undoubtedly, a large percentage of the visitors originate in the neighboring country to the south.

Moreover, the figures released by the department in Ottawa do not tell the whole story, since railway officials, who do not reveal statistics until after the close of the season, are responsible for the statement that they have noted a proportionate increase in the number of tourists brought to the national parks in the west by rail this year.

Even without comment, the figures of the increase in the motorborne tourist traffic to the national parks are of sufficient interest and importance to warrant reproduction.

A Good Increase

Banff National Park, says the news despatch conveying the information, showed an increase of more than 30 per cent. In motor travellers in that period, with 91,500 motor visitors in the last four months compared with 69,292 in the same period a year ago.

Jasper National Park, with 11,480 visitors, showed a gain of 1,440. Kootenay and Yoho National Parks also had increases of 14,006 and 3,376 tourist registrations respectively. A new high of 37,802 visitors was recorded at Waterton Lakes National Park, compared with 42,833 in 1938. Buffalo National Park, Alberta, had 15,202 visitors, an increase of 9,348 visitors.

On the prairies, Riding Mountain National Park, Manitoba, set a new record with 75,449 visitors in the period, 3,841 more than last year. Attendance at Prince Albert National Park in Saskatchewan was maintained.

When comparable average figures are allowed for those parks for which details are not given in their entirety, it is found that the total increase in the number of visitors brought to all these western parks by automobile for the period under review is approximately 55,000.

It is recognized, of course, that all these are not visitors from the United States and other countries, a substantial percentage being Canadians some of them being inter-provincial visitors and some of them visitors to parks within their own province.

Nevertheless, in the absence of statistical data as to the origin of these visitors, it can safely be taken for granted that some of the increase can be credited to "foreign" visitors who, as a result, have made some contribution to an augmented income for the people of this country.

Holidaying At Home

The percentage of the increase that can be attributed to a larger number of Canadians taking their holiday in their own parks is also a matter for congratulation, since it means one of two things: either more Canadians, who formerly visited abroad are spending their vacation money in their own country, or that some Canadians are taking a holiday this year who did not do so in 1938, probably a combination of both. In either event, the result should be regarded as highly satisfactory.

The increasing popularity of the national parks is attributed by the department to the steady improvement of park facilities for tourists and improvement in the roads leading to the parks. Little, perhaps no exception can be taken to the first-mentioned "cause" but there is some reason to doubt the latter.

If a questionnaire were submitted to visiting motorists it would unquestionably be found the consensus of opinion that highways through and in the prairie provinces are not as good as they might be and that increased popularity of the parks is in spite of this handicap, a good argument for the suggestion that more expenditure on the roads would result in a very much larger increase in patronage for these deservedly popular western playgrounds, among the finest in the world.

Trying To Solve Problem

Men Are Seeking Key To Mystery Of Cosmic Ray

Dr. Robert Millikan, noted physicist, has sailed from Pasadena, Calif., on a six months' search for a key to the mystery of the cosmic ray.

Two aides, Dr. Victor Neher and Dr. William Pickering, took more than 50 types of apparatus for detecting and measuring the frequency and intensity of the rays.

The hunt will extend through Australia, Tasmania and India. Cosmic rays constantly bombard the earth, passing through the human body. Only lead will stop them. "But the origin of the cosmic ray is still pretty much a mystery," said Dr. Neher. "I made observations three years ago in India, but only at one latitude. This time we will try several latitudes."

New ray counters which Dr. Millikan is taking will be carried up 90,000 to 100,000 feet by sounding balloons. On the way up they will broadcast the count back to earth to be recorded automatically on tape.

The Greatest Menace

Experiments Show Soil Erosion Biggest Factor In Loss Of Fertility

Experiments conducted at the Dominion experimental farm, Ottawa, over a four-year period show erosion is probably the greatest single factor causing loss of soil fertility, according to Willis Dickson of the field husbandry division.

Experiments showed a large percentage of the available plant food in soil is present in the weathered surface layer and may be permanently lost through removal of that layer of erosion.

Effect on crop growth of varying degrees of erosion was determined in the experiments by growing barley on plots from which amounts of the surface soil had been removed. This dark surface soil, approximately seven inches deep, overlies lighter colored subsoil.

It was shown that when no surface soil was removed the average yield per acre of barley was 39.5 bushels, 32.7 bushels with three inches removed, 18 bushels with six inches removed, and 5.2 bushels with all surface soil removed.

The results, according to Dickson, suggest the importance of employing soil-conserving crops such as sod-forming hay, and of soil saving cultural practices, such as across-the-slope tillage wherever danger of erosion exists.

Tip For Editors

Delinquent Subscribers Might Respond As They Did In Kansas

The editor of a Kansas paper says he picked up a Winchester rifle one day recently and started up the street to return it to its owner. The delinquent subscriber got it into their hands he was on the warpath and a number of them he met insisted on paying him what they owed him. On his return to the office he found a load of hay, 15 bushels of corn, ten bushels of potatoes, a load of wood and a barrel of turnips had been brought in.

As many as 50,000 acorns may be stored in the bark of a tree, where woodpeckers drill holes to store their food supplies.

THAT REMINDS ME— OGDEN'S IS BEST FOR ALL 'ROUND PLEASURE

There's a world of satisfaction in rolling your own with Ogden's Fine Cut. In handy packages of 1 1/2 lbs. tins, Ogden's gives you real value. Of course you'll use the best papers—"Vogue" or "Chantecler".

Will Soon Be Over

Greatest Sun Spot Show Since 1870 Is Nearing End

The curtain gradually is lowering on the greatest sun spot show since 1870.

The current 11-year cycle presented some of the largest spot groups ever observed, easily seen without the aid of a telescope. Twenty-five or more exceeded an area of 1,171,000,000 square miles each.

For the first time short wave wireless fadeouts were linked directly to eruptions occurring near sun spots. These fadeouts ranged from 15 minutes to half an hour.

Telegraph and telephone service was disrupted at intervals by magnetic storms on the earth caused by solar spots, and aurora borealis displays were seen as far south as the Mexican border.

Ships' compasses behaved erratically at times.

Dr. J. O. Hickey, of the Carnegie Institution's Mt. Wilson Observatory, Pasadena, Cal., reported the highest "prominence" yet recorded. He saw a huge, fiery cloud of hydrogen and calcium gas shoot up 870,000 miles above the sun's atmosphere.

The cloud started at a speed of 65 miles a second, jumped to 130 and then to 200, finally easing away in space.

Demand British Goods

Fourteen German Tenders Rejected By Durban, South Africa

Fourteen German tenders for the supply of telephone cables of various types and sizes have been unanimously rejected by the Durban Municipal Tender Board.

They were all to specification and the prices were lowest. The German tenders were rejected in favor of British tenders despite the fact that in one instance the German price was 55 per cent. lower and in others 37 per cent., 31 per cent., and 20 per cent. lower.

The recommendation of the Tender Board, to be confirmed by the Tender Council, means that the corporation will have to pay £2,065 (\$9,705) instead of £1,757 (\$8,257) for cable.

In each case, the telephone manager, J. W. Roxburgh, recommended the lowest tender, "as it is in order and in view of the fact that the lowest British offer is not within ten per cent. of this figure."

In the past the council has always given a preference of 10 per cent. to British goods. In one instance the German tender was £101 (\$474) and the British tender £157 (\$737).

World's Largest Jewel

Smithsonian Institute Has Almost Flawless Topaz Valued At \$5,000

The Smithsonian Institution at Washington has acquired the world's largest jewel. The stone is an almost flawless crystal of topaz, weighing 153 pounds, or 350,000 carats. The average topaz for a ring or necklace weighs about five carats. The huge gem was discovered in the Minas Gerais province of Brazil. Its color is pale blue on the outside and a pale sherry on the inside. The jewel is worth about \$5,000.

Importance Of Water

Where water is easy to get, we are apt to forget the importance of it in the lives of animals and plants. To produce a bushel of ear corn requires about 13 tons of water, and a ton of alfalfa requires something like 86 tons of water.

Away Up North

Lord Tweedsmuir's Son Predicts Big Development For Arctic Country

Tweedsmuir's development of the Arctic country, known as "Away Up North", in the days to come, was predicted by Hon. John Buchan, son of Lord Tweedsmuir, who has just returned to the outside after a year at Hudson's Bay Company posts in the Far North.

The Governor-General's son was stationed on Baffin Island, a large island at the northeastern extremity of Canada's Arctic possession. He was interviewed by newsmen at Saskatoon while en route with the Governor-General to Jasper, Alta.

Mr. Buchan said he liked the north and plans to return as soon as circumstances permit. Walrus shooting was his favorite sport in the Arctic. Fur farming, Mr. Buchan said, has dealt a severe blow to the fur-trading and trapping industries in the north. Fur farming, however, will never entirely replace trapping as a source of supply, he said. In addition to those animals which do not thrive in captivity, there are some, such as the Arctic fox, which cannot be bred successfully in captivity at all.

Speaking of animal life in the far north, Mr. Buchan expressed regret that attempts to preserve the musk ox, which travels in herds around the Arctic Circle, have proved unsuccessful.

Unlike most wild animals, the musk ox never seems to have learned to flee the approach of man, and, as a result, is slaughtered in large numbers by Eskimos.

A Real Problem

Member Of Rothschild Family Admits She Is Puzzled

Hon. Miriam Rothschild, sister of the third Baron Rothschild and member of the famed European banking family, has a problem on her hands. Frankly, she admits, she doesn't know how she is going to collect flea off a live grizzly bear in the Rocky Mountains.

"I can't very well chase a grizzly with a pair of tweezers," declared the young graduate in zoology of London University.

Mrs. Rothschild said she collected worms that was five years old and has been interested in bugs and insects ever since. Study of fleas was the hobby of her banker-father, the late Baron Rothschild, whom she credits with discovering accidentally the flea which carried the bubonic plague.

Hope To Solve Puzzle

Winipeg Doctors Will Study Bacteria Life In Frozen Soil

Just how long bacteria can live in perpetually frozen soil is the puzzle two Winnipeg doctors hope to solve with soil samples taken from below the surface at Churchill, Manitoba's northern port on the shores of Hudson Bay. Dr. A. M. Davidson and Dr. J. Buller, retired emeritus professor at the University of Manitoba, arrived at The Pas, Man., with their samples of solid earth, carefully sealed.

Italian colonies in East Africa, including Ethiopia, total 629,500 square miles and have a population of 6,600,000.

Dream Was Useful

Proved State Coach Too High To Pass Through Arch

Naturally the Duke of Portland knew the Prince of Wales (later Edward VII.) and liked him very much. Before the latter's coronation the Duke had a remarkable dream.

He writes: "The state coach had to pass through the arch at the Horse Guards on the way to Westminster Abbey. I dreamed that it stuck in the arch, and that some of the Life Guards on duty were compelled to herd off the crown upon the coach before it could be freed. When I told the crown equerry, Colonel Ewart, he laughed and said, 'What do dreams matter?' 'At all events,' I replied, 'let us have the coach and the arch measured.'"

"So this was done, and, to my astonishment, we found that the arch was nearly two feet too low to allow the coach to pass through."

"It appears that the state coach had not been driven through the arch for some time, and that the level of the road had since been raised during repairs."—Vancouver Province.

Raids on telephone boxes in the London area alone are responsible for a loss of \$1,500 monthly.

The Pacific Ocean covers more area than all the earth's land put together.

New Heating Method

Detroit Man Claims To Have Invention That Works

A dozen drops of water is all that's needed to heat a room, according to Glenn Watson of Detroit, provided you employ Watson's latest invention. Motivated by electricity, the invention employs the ancient water wheel principle and a new departure in heating units. Coffee can be made in 20 seconds and a steak grilled in 80 seconds, the inventor claims.

The heater turns a film of water into steam as soon as it touches the heating surface. The steam is condensed on contact with the walls of the heating chamber and returns to its source.

Was Busy Month

In seed testing, June is usually considered to be one of the quietest months of the year. Nevertheless, 4,787 tests in all were made during this past June, including 527 tests on binder twine, by the laboratories of the Plant Products Division, Dominion Department of Agriculture.

Rather A Contradiction

The supposition that old people who drive automobiles create a traffic hazard isn't borne out by the report from England that approximately half the motorists involved in fatal accidents are under 31 years of age.

Reports Of Trouble Being Started Again Among Indian Tribes

Calcutta, India.—Fresh outrages are reported from India's turbulent northwest frontier, coinciding with talk of a plan to unite the warlike tribes of that region into a federation.

India's trouble-maker number one, the Fakir of Ipi, is reported today with the idea of a federation of tribes and a Moslem state between the northwest frontier province and the Afghanistan frontier.

In mid-August a British colonel and his two Indian servants were shot dead. Attacks on villages have been plentiful.

The elusive Fakir, former employee in an Indian garrison town who instigated pugnacious tribesmen to undertake a "holy war" against the government, is striving to get the tribes on the warpath again. He is living near the Afghan frontier at Kharre, 50 miles from Bannu.

The big tribes are not anxious to oblige him, having felt the weight of the government's arms lately. It is, however, awkward to dislodge the tall trouble-maker. A large-scale military operation would only cause him to flee into Afghanistan, as he did in 1932. Peaceful measures are equally ineffective because Kharre is a virtual "no man's land" and no big tribe has responsibility for it.

One of the Fakir's two "generals", a 35-year-old gangster named Mushke Alam Khan, has just been killed. He was shot dead in a raid on a village. The Fakir promptly organized a man-hunt for the slayer.

Shipments From Churchill

Total Of Ten Grain Cargoes Assured For This Year

Regina.—Announcement that two more cargoes of wheat have been arranged for shipment via the Hudson Bay route this season was made by Col. R. J. James, chairman of the On-to-the-Bay Association.

This brings the total shipments "fixed" for this season to ten or one-half the objective required to qualify for a reduction in marine insurance rates next year on consignment via Churchill.

Col. James said that to enable 20 shipments to be made through the Bay this season, arrangements will have to be completed for the other ten consignments by September 15. He believed that as a result of the co-operation of the Wheat Board and in view of the fact that there is a heavy crop in the northern part of the province, the objective will be achieved.

Troops For Mediterranean

Britain Is Bringing The Fleet Up To Full Strength

London.—An admiralty official said Great Britain was sending reinforcements to the Mediterranean fleet to bring it up to full strength.

There was no indication how many men were being sent. It was known, however, that several special training camps had been opened in France carrying men crossed France en route to Toulon where they were to join the fleet.

Emergency Bill Has Given Parliament Of Britain Wide Powers

London.—King George placed the great seal upon the war emergency bill at Buckingham palace, after it had been rushed there from Westminster, and it immediately became law.

The bill was rushed through parliament, convened during the emergency, with astonishing speed. Less than an hour after it had been pushed through the necessary three stages in the House of Commons, it went through its three stages in the house of lords. The King was waiting at Buckingham palace to approve it as soon as it was rushed to him. The bill gives the British government virtually dictatorial powers. It provides:

The King shall have power to issue decrees having the force of law. Any property or undertaking except land may be taken over by the government.

Any premises may be entered and searched.

The secretary of state for home affairs may order any arrest he deems expedient.

Attains Terrific Speed

Cobb Exceeded Six Miles A Minute On Utah Salt Flats

Bonneville Salt Flats, Utah.—A new world land speed record of 368.85 miles per hour—better than six miles a minute—was set by John R. Cobb, London fur broker, in his 24-cylinder "Raiton Red Lion."

Cobb, who shot his turbine-shaped car over the flat at the phenomenal speed of 370.75 miles per hour, struck an average on two runs over the measured mile. Far above the previous mark of 357.5 m.p.h. held by another Briton, Captain George E. T. Eyston. Cobb also smashed Eyston's kilometre record with a speed of 369.74.

Red Raiton, with Cobb's triumph, became the first man to claim the achievement of having designed the world's fastest land and water machines. Last week Sir Malcolm Campbell, in a boat designed by Raiton, smashed his own world water record.

Returns To Ottawa

Hon. C. D. Howe Much Encouraged By Conditions In West

Ottawa.—Hon. C. D. Howe, Dominion transport minister, returned to his office from an air tour of inspection to the Pacific coast, much encouraged by conditions he found in British Columbia and on the prairies.

Employment in British Columbia, particularly in Vancouver, had apparently reached an all-time record, the minister said.

Prairie threshing had so far returned a high yield of grain and indicated the crop damage would be much less than previously expected. Mr. Howe was accompanied by Premier Angus L. MacDonald of Nova Scotia who said he greatly enjoyed his first air tour of western Canada.

Indian Hospital Burned

Moosonee, Ont.—Word reached here of the destruction by fire of the \$100,000 St. Anne Roman Catholic school and hospital of Holy Angels mission at Port Albany, 100 miles north of Moosonee on James Bay. Every Indian school child and every Indian patient in the hospital was removed safely from the institutions.

Mortgage Bank Opens Soon

Ottawa.—Actual operations of the new central mortgage bank will begin within six weeks, it has been learned. It is expected the bank by that time will begin making membership agreements with companies holding an estimated \$375,000,000 in farm and urban mortgages across Canada.

Peace Leader Resigns

Toronto.—A. A. MacLeod, chairman of the Canadian League for Peace and Democracy for the past five years, has resigned. MacLeod accepted a special delegation to the first world congress on disarmament in 1936, and was elected to the general council.

Any act of parliament or of the parliament of Northern Ireland may be set aside or amended by decree. The treasury may impose any scheme of financial control authorized by defence regulations with the provision that the order must be approved within 28 days by the House of Commons.

The King may apply any order under the act to any colony, protectorate, territory, "or foreign country in which for the time being His Majesty has jurisdiction."

Judicial proceedings may be heard in camera if the court deems it expedient. Violations may be punishable "on summary conviction" to a fine of not more than £100, imprisonment for not more than three months, or both; and upon indictment, and conviction to £500 fine, or two years' imprisonment, or both.

Such authorities may be specified and may be empowered to make orders and bylaws for any of the purposes of the act.

2322

Ready To Move Grain

Saskatchewan Divisions C.N.R. Expect To Handle 60,000 Carloads Saskatoon.—"The Saskatchewan division of the Canadian National Railways, which includes three divisions, Saskatoon, Regina and Prince Albert, with headquarters at Saskatoon, now is prepared to handle the heaviest crop in 10 years, the movement of which, from this district alone, will be well in excess of 60,000 carloads." W. J. Munro, general superintendent of the Saskatchewan division, Canadian National Railways, said.

"This is thought to be a conservative figure of the grain that will be moved, and does not include grain held for feed, seed, etc.," Mr. Munro said. "Present indications are that there will be nearly as much grain moved from off the Saskatoon division alone this year, as was moved from the whole three divisions, comprising the district, last year."

For some time past, many extra men have been employed in preparing locomotives and cars to meet the anticipated movement. We expect that all available rolling stock will be pressed into service this season. Over 50 men have been employed at the Saskatoon terminal alone preparing rolling stock for the big crop movement.

"When the crop movement is fully under way, it is expected that all trainmen, engineers, telegraphers, as well as employees of the mechanical and car departments, will be employed. This means that men who are now laid off will be placed back at work. During the peak movement it may be found necessary to employ additional men."

Floods In Tientsin

Have Taken Enormous Toll Of Life And Disease Is Spreading

Tientsin.—Officials seeking aid for flooded Tientsin said that some 3,000,000 persons were affected by the mounting waters of the Hai river. The floods were known to have taken an enormous toll of life.

Both British and American authorities planned to evacuate their women and children if boats could be obtained.

Disease spread rapidly and authorities were unable to obtain sufficient vaccine and medicine.

In the midst of this disaster the British were informed that the anti-British campaign at Peking, 150 miles north of Tientsin, had become so intense that English women and children must be taken away.

For Polish Defence

Canadian Poles Have Contributed \$21,998 For This Purpose

Winnipeg.—President F. Sedziak of the Polish National Defence committee of Canada announced Polish Canadians have contributed \$21,998 to Poland's defence funds. Poles in Manitoba contributed more than \$4,000.

The committee was organized after abrogation of the Polish-German non-aggression pact and embraces almost every Polish organization in Canada.

Ambassador Returns

Cannes, France.—United States Ambassador Joseph P. Kennedy interrupted his vacation on the French Riviera to fly back to London by a special plane. His secretary said Mr. Kennedy felt he should be present in London during the British cabinet meeting.

AIR MINISTER DISCUSSES TECHNICALITIES

Sir Kingsley Wood, British Air Minister, consults with Air Chief Marshal Sir Hugh Dowding regarding the Royal Air Force defences of England during possible invasion.

AWARDED DEGREE PH.D.

Michael Timonin of the Division of Bacteriology, Dairy Research, Science Service, Department of Agriculture at Ottawa, who has been awarded the degree of Doctor of Philosophy by Rutgers University, N.J. A native of Novozouensk, Russia, Dr. Timonin came to Canada in 1925 and secured his B.S.A. degree from the University of Manitoba.

Renews Service Pledge

Canadian Legion Is Ready To Act If Emergency Arises

Vancouver.—Brigadier W. W. Foster, Dominion president of the Canadian Legion, said he had wired Prime Minister Mackenzie King, renewing the legion's offer to place 60,000 registered war veterans at the disposal of the Dominion in time of emergency.

"In the present crisis, as in the past, the entire resources of the Canadian Legion are placed at the disposition of their country," Brigadier Foster said in an interview in which he disclosed he had sent the telegram to the prime minister.

Sixty thousand members of the legion and sister organizations who served in the last war have already registered to insure internal security and are immediately available if required.

"During the past year, the Canadian Legion has sponsored a national registration of war veterans willing to volunteer their services in time of emergency."

Robert Wilkinson, Dominion president of the Army and Navy Veterans' Association, said in a statement on the international situation, "we are altogether behind the Empire, come what may."

"We are the same as we were last September, during the Munich crisis when, at the Winnipeg conference, we voted unanimously to serve our country in any way we could," he said.

Japan's Foreign Policy

May Be Altered By Germany's Pact With Russia

Tokyo.—It was reported Emperor Hirohito intends to summon an imperial council meeting to consider Japan's foreign policy in view of the diplomatic emergency precipitated by Germany's pact with Russia.

For the moment, preponderant government opinion was that Japan should seek improved relations with the United States and Great Britain because they considered that Germany had forfeited their confidence. It was learned that the emperor was shortening his stay at Hayama, his summer residence, and was returning to Tokyo.

Britain And Poland Sign Agreement For Mutual Assistance

Appeal From Roosevelt

Methods Suggested To Keep Peace Between Germany And Poland

Washington.—President Roosevelt addressed appeals for peace to Fuehrer Hitler and President Moscicki of Poland, suggesting three methods for avoiding war.

These were: 1. By direct negotiation. 2. By submission of their controversy to impartial arbitration. 3. Agreement to adopt the procedure of conciliation, selecting a conciliator or moderator.

This was President Roosevelt's second peace appeal of the day, his first having been addressed to King Victor Emmanuel of Italy.

President Roosevelt's secretary, Stephen T. Early, pointed out the president did not have in mind any other decision such as was made at Munich last fall, since in his message to the president of Poland and Hitler the president said:

"Both Poland and Germany being sovereign governments, it is understood, of course, that upon resort to any one of these alternatives I suggest, each nation will agree to accept complete respect to the independence and territorial integrity of the other."

Satisfaction Is Sought

Japan Presents Demands To Britain Over Killing Of Policemen

Shanghai.—Japan's controlled authorities threatened serious action against the international settlement unless it gave satisfaction for killing of two pro-Japanese policemen by a British police sergeant. Six Chinese policemen were wounded in the incident.

A note to the settlement's municipal council warned that "suitable measures" would be taken unless the following four demands were complied with:

Punishment of all persons implicated in the incident; a report to the Japanese puppet Chinese mayor of the Japanese-controlled areas of Shanghai, of the disciplinary measures taken; payment of indemnities to the families of the dead and damages to the wounded; and apologies and assurances that such incidents would not recur.

Six Vessels Chartered

Montreal.—Six vessels have been chartered to carry Canadian wheat to Great Britain next month, a Montreal shipping firm reported. It had been informed in shipping cable reports from Britain.

Problem Over Surplus Of Wheat In Canada Has Become Easier

Ottawa.—Canada's surplus of wheat does not loom as the problem it was a few weeks ago.

It was a coincidence that, when George McIvor, chairman of the Canada Wheat Board, and the secretary, Dr. T. W. Grindley, arrived in Ottawa to discuss wheat quotas with Hon. W. D. Euler, minister of trade, to see how the surplus could be disposed of without breaking the market, the war scare was shooting wheat prices upwards.

Mr. McIvor announced the board had sold almost all its cash wheat from last year's crop so it will not be able to recoup losses to any great extent from an advance in spot wheat prices, but no doubt in selling the cash wheat the board took futures to a considerable extent. The board chairman declined to discuss that phase. It would be on those that losses on the year's transaction might be reduced.

The board bought last year's crop at 80 cents a bushel basis No. 1 Northern at Fort William and Lion. J. G. Gardiner, minister of agriculture, estimated it would cost the federal treasury \$45,000,000 when speaking in the House of Commons last winter.

Cash or spot wheat is wheat sold for immediate delivery. Wheat futures are contract for the delivery of wheat at a future date. In selling out the bulk of the 1938 crop, which it purchased at a basic price of 80 cents, at prevailing prices the board no doubt took a heavy loss.

London.—A formal agreement of mutual assistance between Britain and Poland was signed at the foreign office by Viscount Halifax, foreign secretary, and Ambassador Count Edward Raczyński.

The agreement consists of eight articles setting forth the circumstances under which the parties would go to each other's assistance.

"It is a source of lively satisfaction to both governments that the negotiations for the present agreement have been so speedily and satisfactorily concluded," a foreign office official statement said.

"This agreement replaces and gives formal effect to the provisional agreement reached between the United Kingdom government and the Polish government during Foreign Minister Joseph Beck's visit to London last spring and announced in the House of Commons on April 6," the statement added.

Timing the announcement of the signatures was considered significant in the light of the reported attitude of skepticism in Germany toward Britain's determination to aid Poland.

The pact provides that if one of the contracting powers becomes engaged in hostilities with a third power in consequences of aggression by the third power, the other immediately will render all support and assistance in its power.

In event of any action by a European power which clearly threatened, directly or indirectly, the independence of one of the contracting parties and was of such nature that the nation in question considered it vital to resist with its armed forces, the other would be obligated to give its aid.

Conquers Difficult Climb

Canada's Woman Ski Champion Reaches Peak Of Mount

Jasper, Alta.—Gertrude Wepesla, Dominion ski champion, made Canadian mountaineering history as the first woman to conquer the difficult ski ascent to the peak of Mount Athabasca. The Vancouver star and two professional skiers, Peter Vade of Switzerland and Ted Bishop of Edmonton, reached the summit of the 11,452-foot snowcap seven hours after starting out from the lower tongue of Athabasca glacier.

Only previous ski ascent of Mount Athabasca was recorded in June by Benno Rhyzhik, former instructor at the famous Arlberg ski school in Austria. Miss Wepesla's ascent was the first by a Canadian woman. It had been informed in shipping cable reports from Britain.

At a price above the 80-cent level is not necessary to give the board a profit on its futures which might serve to offset its losses. So long as the futures prices rises above the price at which the futures were purchased and the board disposes of its holdings the operation would be profitable.

For the 1939 crop the board is paying 70 cents a bushel basis No. 1 Northern at Fort William, so market prices still are below the board's. However, with unsettled world conditions, farmers may be inclined to hold back their wheat.

Until the situation became critical it was felt the wheat this year would be rushed to the elevators and with a big crop in prospect and a 95,000,000 bushels carryover from 1938 difficulties were anticipated. There was no expectation then that the market would go above the board's price, but now there is a strong possibility, so the farmers may be inclined to hold their wheat knowing they can always get 70 cents from the board and if the market goes above 70 cents, they can sell to the trade at the higher price.

THE WORLD of to-morrow demands that we make the best use possible of our abilities in the world of to-day.

NOTES AND COMMENTS

SCARE headlines in daily newspapers on the European negotiations bring forth adverse comment from a number of weekly newspapers. The Bowmanville Statesman (Ontario) states: "With but too few exceptions the daily papers are destroying the morale of the reading public by the sensational way in which they feature international situations. Some papers, especially, would make a contribution to health, happiness and prosperity if they dumped their headline type into the nearest river."

IN this connection, striking contrast is noticed on comparing what is considered an important international newspaper, the Christian Science Monitor, with some dailies. This paper is possibly as well or better informed, through its correspondents in various world capitals, on international developments than most newspapers, yet it does not play up in sensational style every move that is made. It gives the news, calmly and without hysteria, instead of inciting emotional fears which scare headlines certainly do to a large percentage of people.

DURING the visit of the King and Queen to Canada the scare headlines on European affairs were noticeably absent. Yet negotiations quite as important were proceeding. Now, of course, the European muddle is played up much in the style of the barker at the circus. The people want the truth, and the latest news, but why add sensationalism which breeds fear, uncertainty and destroys confidence and goodwill? As the Bowmanville Statesman rightly observes: "A good deal of the present stagnation of business is owing to the sense of insecurity created by the dime novel method which some Canadian dailies use in presenting foreign news."

BILLY Evans, long time resident of Coleman, and Seth Raymond, asked some rather perplexing questions on the street corner last Saturday afternoon. "Can you tell me what is an independent government?" says Billy. Our only reply was that his guess is as good as ours, and that there ain't any such animal. He also claimed that under the present provincial government he is paying in taxes on the present basis, in ten years, the entire value of his property, though he was told in 1935 that taxes were to be cut in half and he was to get \$25 a month.

Seth chimed in by frankly admitting he signed the covenant, whereby dividends were to be assured to all who "co-operated" with Mr. Aberhart, but he likewise found that taxation had increased. As a parting shot he said he thought the Conservatives were the best of the lot.

THESE interesting sidelights are observed in order to show the trend of people's minds, for the average man, or woman, frankly admits that the golden era so glibly forecast in 1935 is as far removed as ever. Not so with Aberhart, Manning et al, who have taken from the public treasury of Alberta, salaries from \$40,000 each down to \$8,000 for the ordinary member during four years of office. Sure, they received handsome dividends, while Billy and Seth and thousands more paid increased taxes.

And it was all to be so easy to bring down pennies from Heaven.

INCREASES in school taxes bring protests not only in Coleman, but from farmers, for in the Calgary Herald a Mr. Doyle of Champion writes: "In 1937 on the south half of Sec. 27, Tp. 15, R. 23, I paid \$15.33, in 1938 I paid \$20.44, for 1939 my tax notice is \$56.21. Put this in The Herald and see if you can wake up some of the people." Seems that if educational frills are costing more than the taxpayers can afford, the frills must be eliminated. Aberhart's enlarged school districts increase taxes instead of decrease.

A VISIT TO THE COUNTRY

A visit was paid last Friday to the farm home of Mr. and Mrs. F. T. Edwards, Pincher Creek. It is ideally located in the shadow of the mountains, with the creek running through it, and they have a spacious house named "Londerry." It was the home of Mr. and Mrs. Redfern, who owing to advancing age moved to the Pacific coast. Near by the residence is the original home of Mr. Redfern, a one-roomed place in which it is reported the first political meeting in the district was held, about fifty years ago. Here a number of genial souls gathered, so report states, and killed a beef, and with a copious supply of refreshments, listened to the late John Heron's speech—at least John kept on talking, whether they listened or not. However John was elected as a Conservative.

Mr. Edwards is owner of the Pincher Creek Echo, the Betterways Stores, and other business and residential property in Pincher Creek. Which reminds the writer that Charlie Barber, proprietor of the Chilliwack Progress, has a fine home in the country. Some newspaper proprietors have found the way to acquire country estates, where they may enjoy relaxation.

Efforts Continued for Artificial Ice

Co-Operation of Mineworkers Will be Sought to Raise Funds To Meet Cost

It has been suggested that in order to complete the effort began earlier in the summer to raise funds to install an artificial ice plant at the arena, that a canvass of the mineworkers be made, as quite a large number have indicated their willingness to contribute a monthly sum in order to help promote senior hockey and to keep Coleman in the running as a contender for the Allan Cup, the highest honor in amateur hockey in the world.

Arrangements will be made with the above end in view, and the support of all who love good sport is urged. Artificial ice will overcome the handicap under which Coleman Canadians labor and its installation here would enable the team to get under way at the same time as other teams in the senior league. It is well worthy of everyone's support, and the committee anticipates a generous response to the effort to raise funds.

Canadian Weekly Newspapers Association

A Visit to The Canadian Pavilion at The New York World's Fair

On the occasion of the visit to the World's Fair of Canadian Weekly Newspapers Association delegates, following their annual convention at Niagara Falls, Ont., a very cordial reception was accorded them at the Canadian Pavilion by Mr. Douglas S. Cole, Canadian trade commissioner, Mr. C. H. West assistant trade commissioner and other representative men.

Credit indeed must be accorded to the department of which the Honorable W. D. Euler, M.P. Canadian Minister of Trade, is the head, and to the staff in charge of the Canadian exhibit, for on a comparatively small appropriation of \$400,000 compared with other countries millions, they have displayed the resources and attractions of the Dominion of Canada in a most striking manner.

It is estimated that more than 90 per cent. of the work on the interior decorations, fittings and displays at the Canadian pavilion were done in the Dominion, and in the construction of the building itself as much Canadian material has been used as possible. Canada's display is a standing exhibit of Canadian skill in the arts of architecture, painting, sculpture and photography as well as a monument to Canadian constructing ability.

The feature motif of the exterior is the large entrance, symbolic of Canada's open door policy to all visitors and the lack of obstructive red tape at her borders.

The huge map which immediately attracts the eye on entering the building, covers an area of 1,070 square feet, and is the map used in the Glasgow exhibition. It features the salient points of interest of Canada, such as mineral areas, fisheries, wheat growing districts, lumbering, developed water falls, etc. These are all illuminated separately from an automatic switch-board.

Of particular interest to Albertans was the Canadian Pacific Railway's diorama of Banff, accurate in its minutest details, even to moving automobiles on the highway and the trains on the railway track.

Concerning the tourist attractions of the Dominion, in conversation with the commissioner on duty at the desk, it was amusing to be told of an American visitor who walked into the pavilion, and after looking

around, asked: "Where's the Quints?" evidently expecting them to be part of the exhibit. When told they were several hundred miles away up at Calender, Ont., he said he would have to go there, as he came to the Canadian pavilion particularly to see the Quints.

The Canadian exhibit is remarkable for the comprehensive way in which it portrays the Dominion's resources, and the designers are to be complimented on the wonderful job they have done. It makes the Canadian visitor feel proud that this country is worthily represented in the great World's Fair, and that it has courteous officials to meet all requests for information.

Following a reception in the Canada building, the visiting newspapermen and their ladies were entertained to a luncheon in the administration building of the World's Fair, where several high ranking officials of the Fair were at the head table, and which was presided over by Mr. Cole, who was a very genial host, and whose wide experience in various lands as trade commissioner of Canada eminently fits him for the job of developing Canada's foreign trade.

It was also of interest to learn that Mr. C. H. West, assistant trade commissioner, now of New York, is a son of the late Superintendent West of the old Royal Northwest Mounted Police, and knows the Crows Nest Pass well, having resided in Cranbrook and visited the towns in the "Crow" at various times. He enquired from the writer of intimate details concerning this area.

Thanks were expressed by the visitors to Mr. Cole and his assistants for the cordial reception and it was regarded as one of the highlights of the visit to what undoubtedly is the greatest show on earth—the New York World's Fair.—H. T. H.

Road Hogs are a Menace

Though there are "Slow" signs at the corner of Centre street and Fourth street, (tennis courts) a car owner driving at excessive speed almost caused a head-on collision with a car driving slowly. Drivers of that type are a menace to those who observe the rules of the road. Courtesy is absolutely lacking on the part of some.

The National Safety Council's 1939 edition of its statistical year book showed 94,000 persons died in accidents, 13,000 of which were from motor vehicle accidents.

"The Hot Mikado" at the World's Fair

Gilbert & Sullivan Comic Opera Transformed Into Swing and Jazz by Colored Caste

Among the shows enjoyed by the visiting delegates of Canadian Weekly Newspapers Association to the World's Fair, New York, following their 20th annual convention at Niagara Falls, in August, was that of "The Hot Mikado," with Bill Robinson of screen and radio fame, in the role of The Mikado.

One's first thought on seeing and hearing the opening chorus, is that the original composers would be astounded if they were to come to life, to see this old favorite Gilbertian opera being treated in so light a manner, but one must acknowledge that the tempo is faster and snappier than the original, and just as catchy. The original music is used, but set to swing time and with orchestral accompaniments that are indeed fine. In fact most people who have seen the original confess that they like better "The Hot Mikado," with its colored cast of over a hundred who threw themselves into the various dances with the utter abandon yet rhythmic swing that colored people are so adept at. You feel you want to "swing it" with them.

The Three Little Maids, The Lord High Executioner, all old favorites of the original opera are well portrayed, with more humor than the originals, for the colored cast inject that gaiety into the production which is highly infectious, and the show comes to an end all too soon.

It is one of the top-notch shows of New York and is drawing big crowds, having gained wide notoriety from the fact of it being a Gilbert & Sullivan opera converted to swing time, something undreamed of when it was first produced in London fifty years ago, by the D'Oyly Carte Opera Company at the Savoy Theatre.

Brilliant Student Left For Paris

Miss Eleanor Aiello, recently graduated from Alberta University, who was awarded the 10,000 franc bursary given annually by the French government, left on Sunday for Paris, where she will study during the coming year.

She was honored on Friday evening when a number of her friends gathered at the Catholic hall in Fernie and presented her with a handbag and a pair of gloves.

Mr. and Mrs. Dave Young and daughter of Bellevue, accompanied by Mr. and Mrs. Tom Hibbert and son, motored to Spokane last week, returning at the weekend.

Mr. and Mrs. Angus Hughes left on Saturday afternoon for two weeks vacation at the coast.

Mr. and Mrs. R. R. Pattinson are spending a few days visiting in Penticton, B. C., the guests of Mr. and Mrs. G. W. R. LeRoy.

NOTICE

IN THE ESTATE OF HENRY ANTEL, late of Coleman, Alberta, rancher and contractor, deceased. NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of Henry Antel, who died on the 27th day of July, 1939, are required to file with the undersigned by the 30th day of September, 1939, a full statement duly verified of their claims and of any securities held by them, and that after that date the

Administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

DATED this 22nd day of August, 1939.

R. F. BARNES, Coleman, Alberta, Solicitor for the Administratrix.

Weekly Newspaper Delegation in New York

Seen here are the leaders of a delegation of 170 members of the Canadian Weekly Newspapers' Association, as they were received at the Canadian pavilion of the New York World's Fair. Left to right, top row: C. H. West, assistant Canadian trade commissioner; Geo. Rehn, fair official; R. L. Greene, Canadian exhibits commission. Centre row: Mrs. C. V. Charters; Mrs. F. J. Burns; Senator R. Lacasse, Tecumseh, Ont.; S. N. Wynn, Yorkton, Sask., and S. S. Robertson, Canadian Press chief in New York. Bottom row: C. V. Charters, Brampton, Ont.; F. J. Burns, Kentville, N.S.; Douglas S. Cole, Canadian trade commissioner; Miss Audrey Halliwell, and H. T. Halliwell, president of the association.

WORLD HAPPENINGS
BRIEFLY TOLD

"Journal 1936-1937" by Helen Keller has been included in a list of books banned by the police at Berlin. No reason was given.

U.S. political circles considered the possibility Harry R. Woodring, secretary of war, may be the next United States minister to Canada.

Surgeon Rear-Admiral Cresner, in charge of the Royal Naval Hospital at Gosport since 1937, has been appointed honorary physician to the King.

A retired Mexican soldier claiming to be 116 years old, Luis Flores, married Senorita Agripina Tovar Ramirez, aged 65, to whom he had been engaged since 1908.

The \$8,000-ton cruiser Kenya was launched at Clydebank, Scotland, in the presence of the Duchess of Gloucester, many other notables and 15,000 shipyard workers.

Frank Arthur Greenland, 50, one of two Canadians to receive a special medal from the lord mayor of London for shooting at the first enemy zeppelin over London during the Great War, died in hospital at Toronto following an operation.

The official Dutch air line, KLM, discontinued service on all domestic and seven foreign routes when most of its pilots were mobilized. Only London, Berlin, Paris and Stockholm service will be maintained.

The 20 new minisubmersibles provided for under the 1939 naval program will be known as the "Tree" series, bearing such names as Astoria, Elm and Fir tree, the British admiralty announced. Construction will begin shortly.

The British Columbia government will send from 200 to 300 young men, trained as prospectors and geologists, into northern British Columbia following completion of a survey of proposed routes for the British Columbia-Alaska highway, Minister of Mines W. J. Asseltine announced.

Are Always Practical

Chinese Straightened Out Wedding Tangle Without Any Trouble.

Here is an amusing story which shows that, in spite of civil war and Westernization, the Chinese retain their ancient sense of the practical.

Two Chinese brides were being conveyed in the traditional sedan-chairs to their husbands' homes, the way they were overtaken by a storm, and brides and bearers took shelter in a neighboring tea-house.

When they came out, the brides entered the wrong chairs. The bearers did not notice the error, because the brides were heavily veiled.

It was only when the brides reached their homes where the husbands had prepared a feast for the relations that the mistake was discovered.

Then a family council took place. As it was established that all four families were of equal financial and social status, it was decided that what Fate had ordained must be accepted. With general acquiescence each husband then kept the wrong bride.

Made Some Good Sales

B.C. Congress Committee Had Good Success At Poultry Show

As a result of its fine display of live birds at the 7th World's Poultry Congress, recently held at Cleveland, Ohio, the British Columbia Poultry Committee, an organization of Record of Performance (R.O.P.) poultry breeders, some good sales of birds and cases of hatching eggs for breeding purposes were made. Shipments totalling about 200 birds were booked to Denmark, New Zealand, Cuba, and several states of the United States. The display included Bred Orpingtons, Light Sussex, White Wyandottes, Silver Spangled Hamburgs, Rhode Island Reds, Barred Plymouth Rocks, White Leghorns, Pyle Game Bantams, and Rose Comb Black Bantams.

Needed Assistance

British Cruiser Had To Have Help To Remove Bees

The case of the English robins who built their nests in an aeroplane and refused to be evicted, was mentioned recently in these columns; and now comes the affair of the bees who endeavored to put to sea. These lately invaded a British cruiser while she lay at anchor in Portland Harbor. They took possession of one of the boats on the davit; and gave rise to an episode, perhaps without parallel in the glorious records of the British Navy: for here a man-of-war, having probably nothing nearer to bee-veils than torpedo-nets, was forced to send for the police to repel boarders.—The Christian Science Monitor.

A Canadian Species

House Finches Have Been Seen Recently In British Columbia

Far from their usual range, which normally extends as far north as Oregon, Idaho and Wyoming, a pair of house finches took up residence in Okanagan Landing, B.C., during the month of June, raised a family, and then departed. This unusual bird event was recorded by J. A. Munro, District Migratory Bird Officer of the Department of Mines and Resources. The house finches built their nest in a Virginia creeper which climbs the verandah of the bird officer's home. Both birds were shy and quiet, contrary to their usual habits, and when first examined the nest contained five eggs. At the least disturbance the female would leave the nest. On different occasions the male was observed in her company and also on his singing perches, one of which was a nearby telephone wire, and another, a fence wire. A week after the eggs were hatched, the young left the nest, and since that time neither the adults or young have been seen in the vicinity.

In addition to its occurrence at Okanagan Landing, the house finch has recently been found in Penticton and Victoria, B.C. The three towns fairly well establish it as a Canadian species.

Textbook On Fingerprint

Scotland Yard's Latest Work Pivotal In U.S. State's Hoover

One of Scotland Yard's latest textbooks on fingerprints has been "pirated" in the United States, according to a message received by the Metropolitan Police Receiver from J. Edgar Hoover, chief of the "G-Men".

The book took three of the Yard's finest experts three years to complete, and describes a new single fingerprint system invented by them. It is illustrated with fingerprints of criminals.

Only a limited number of copies were made for distribution to police forces abroad, and the copyright is vested in H.M. Stationery Office.

The "pirate" who took sections of the work to make a text-book for a postal course for would-be 'feds not only infringed the copyright, but told clients that when they took a degree with the aid of the copyright they would be eligible for employment at Scotland Yard!

SELECTED RECIPES

PUMPKIN CREAM PIE

2 eggs
1 tablespoon Benson's or Canada Corn Starch
1 cup brown sugar
1 cup Crown Brand Corn Syrup
1 cup cooked pumpkin
1 cup milk
1/2 cup cream
2 teaspoon each—cinnamon, nutmeg, ginger and salt
2 tablespoons melted butter to mix
Temperature: 450-525 degrees F. Time: 30 to 40 minutes.
Line a 9-inch pie pan with raw pastry. Beat eggs, add remaining ingredients and mix thoroughly. Pour into pastry shell. Bake in hot oven (450 degrees F.) for 15 minutes; reduce heat to 350 degrees F., and continue baking until a silver knife inserted in the filling comes out clean. Just before serving, garnish with mounds of sweetened whipped cream. Make a depression in center of each mound and fill with one teaspoon Crown Brand Corn Syrup.

BACON BRAN WAFFLES

1 cup milk
1 cup Whole Bran Shreds
1 cup sifted flour
3/4 teaspoon salt
3/4 teaspoon baking powder
1/2 teaspoon salt
2 eggs yolk, well beaten
4 tablespoons melted butter or other shortening
1/2 cup chopped cooked bacon
2 egg whites, stiffly beaten
Pour milk over bran and let stand five minutes. Sift flour once, measure, add baking powder and salt, and sift again. Add egg yolks and butter to bran mixture. Add flour and blend. Add bacon. Fold in egg whites. Bake in hot waffle iron. Makes four 4-section waffles.
Note: One cup finely cut cooked bacon may be substituted for cooked bacon in this recipe. Sprinkle bacon over batter just before cooking waffle iron.

A Lucky Woman

Is Given Ownership of Treasure Found On Her Property

A coroner's jury at Ipswich, Eng., ruled that the burial shop of an East Anglian ruler of the sixth century, containing some of the finest ancient jewellery found in Great Britain, belongs to Mrs. Edith M. Frey on whose property the ship was unearthed.

The find of coins, gold ornaments and utensils, made August 2, was believed to be the tomb of Raedwald, King of the East Angles.

Coat Given To Museum

The long black cloak Marshal Ferdinand Foch of the French Army wore for inspections throughout the Great War has been presented to the Case Museum at Hazebruck, France, by "Papa" Foch's widow, 7322

A Good Forecaster

Mirrors Used In Delicate Instrument Which Predicts Weather

A new weather instrument so delicate it can measure the temperature of drops of water a mile above the earth was announced by the American Meteorological Society.

It's all done with mirrors, explained Dr. C. H. Heck, of North Carolina State College, who did the original research.

By concentrating the light of the sky on a "cascade" of mirrors, he said, it is possible to detect changes of as much as 35 degrees Fahrenheit in the upper atmosphere and to use such changes in predicting weather for the following 24 hours.

The instrument used is essentially a group of mirrors which successively concentrate light onto smaller and smaller surfaces until the total light falling on the largest one is focused on a thermocouple—an instrument which can measure heat changes in thousandths of a degree. Even a tiny change in the amount of light reflected through the series of mirrors will register on the thermocouple and be detectable on a meter.

Dr. Heck said that any changes in the amount of moisture in the upper atmosphere, even to increase and decrease in the size of drops of completely invisible clouds, cause changes in the amount of light reaching the earth. Thus, by measuring the amount of light it is possible to tell the nature of the air overhead and to determine the upper air temperature.

The instrument is so sensitive, Dr. Heck said, that it can be used as well at night as during the day-time.

HOME SERVICE

ETIQUETTE SLIPS BETRAY YOU SOCIALLY

ETIQUETTE SLIPS BETRAY YOU SOCIALLY. Why Risk a Bad Impression? "Meet Mrs. B." booms Mr. Brown, so pleased to know prominent visitors at the summer hotel. But what a poor impression your introduction will make, Mr. Brown. Such phrases as "Shake hands with—" "Meet—" are bad form. And correct to introduce a man to a woman. Say "Helen, this is Mr. Jameson," then say to Mr. Jameson: "A woman. A man doesn't speak of his wife as "Mrs. B." or "Mrs. Brown."

And Mrs. Brown, don't you know whether or not to shake hands? Etiquette says the woman has her choice, but you accept a man's hand if he extends it.

When an acquaintance joins your group, it's a mark of good breeding to include him in your conversation. Say graciously, "We were just discussing the canoe races, Mr. Smith." And for polite at all times know the rules for who goes first—though a door, getting off a bus or street car. Easy to be gracious, self-assured, with the etiquette rules given in our 32-page booklet. Gives smooth manners for travelling, visits, clubs, the streets, parties, games, dates. Tells how to be a charming hostess; a popular guest.

Send 15c in coins for your copy of "Etiquette: The Correct 'Do's' to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The following booklets are also available at 15c each:

172—"Effective Phrases for All Occasions"

161—"New Ideas in Making Curtains and Draperies"

The only sure way of avoiding mistakes is not to do anything.

"How often have I told you that you mustn't eat biscuits in bed?" —From Der Lustige Sachse, Germany.

CHEERY BUTTON-FRONT COTTON

By Anne Adams

Are you the "I-hate-to-get-up-in-the-morning" type? You'll view the dawn with new eyes in this fresh little cotton frock, Anne Adams' Pattern 4137. The front-buttoning makes it a quickie in and out, and you spread it flat for speedy ironing. And see those grand side panels—they'll slim your hips and widen your skirt to a youthful flare. There's a generous panel in the back skirt too. Don't you love the way the collar scallops its way all around ending short or extending into curved revers? It would be most effective in contrasting fabric, with cuffs to match. Rib-rac or ruffles add a gay touch, and a pocket gives extra chic. Pattern 4137 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42. Size 16 takes 4½ yards; 35 inch fabric and ¾ yard contrast.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

When Icebergs Look Black

While Still Land-Locked Dust Settles On Their Surface

Mr. Mackintosh, who spent five years in Discovery II, investigating the distribution and breeding of mammals and the formation and wanderings of icebergs in the Antarctic seas, has some interesting things to say about his observations.

Glaciers flow from the land into the sea, where a portion breaks off, thus forming the giant icebergs that start their travels in the open waters. Sometimes these bergs appear to be black, due to the fact that, while still land-locked, dust has settled on their surface, to be superimposed with a thin layer of transparent ice.

It is curious that though the Antarctic continent supports very little animal life, the Antarctic seas are more crowded with it than the tropical seas. Practically 90 per cent. of the world's supply of whale oil comes from whalers harpooned in the Antarctic Ocean. Apart from whales, however, the inhabitants are mainly minute forms of marine life.—London Tit-Bits.

Andrew Carnegie's fortune amounted to \$400,000,000, of which he gave away more than \$350,000,000.

Hugo, Bishop of Ely, founded the first college of Cambridge in 1257.

"How often have I told you that you mustn't eat biscuits in bed?" —From Der Lustige Sachse, Germany.

SUNDAY SCHOOL LESSON

SEPTEMBER 3

ISAIAH: A LIFE DEDICATED TO GOD

Golden text: Here am I; send me, Isaiah 6:8.
Lesson: Isaiah 6:1-13.
Devotional reading: Psalm 47:1-9.

Explanations and Comments

A Vision of God, Isaiah 6:1-4. "In the year that King Uzziah died, I saw the Lord." "The conception of Isaiah's vision is singularly pure and lofty. It is a worshiper's thoughts when he draws near to God. The vision is but the service in the temple transfigured. The prophet fell into a trance while holding the service and musing on its meaning. Suddenly the house and roof lifted itself up till it seemed the dome of God's palace on high under which he stood, and the Lord the King sat upon his throne receiving the adoration of all holy beings" (A. B. Davidson). And his train filled the temple.

Above Jehovah stood the seraphim, "the burning ones," as the Hebrew words mean; compare Ezekiel 1:13, 14. "They are not angels," Phillips Brooks tells us; "they are rather the expressions of the forces of the universe which dwell beside the throne of God; they are titanic beings in whom is embodied everything of strength and obedience which anywhere in any of the wilds of God is doing his will." These majestic beings stood in the presence of the Divine Being and reverently covered their faces with a pair of wings, being thus able to look up to the throne of his resplendent brightness; and humbly covered their feet with another pair of wings, for in that majestic presence they were overwhelmed with a sense of their own unworthiness; and eagerly used the third pair of wings with which to fly, for they were winged for service.

A Vision of Self, Isaiah 6:5. God's holiness and glory made the prophet conscious of his own weakness, and he exclaimed, "Woe is me! for I am undone." For many eyes have seen the King Jehovah of hosts. He heard the seraphim praising God, and at that moment he saw that his lips (his nature) were unfit to join in the song: "I am a man of unclean lips."

A Vision of Service, Isaiah 6:8-13. Now came the command, but no request; and Isaiah answered, not from compulsion, but of free will, "Here am I, and who will go for me?" "Here am I, send me." The vision of God gave Isaiah a vision of himself, and a confession of sin brought a consciousness of salvation; that reception from God led to service for God.

Remembers Famous Drive

Ontario Man Has Picture Of Horses And Wagons

Further to the recent inquiry by a Californian as to the 12-horse hitch, said to have been driven by a man named "Slim" some years ago, S. A. Kingston, Regina Leader-Post reader of Prescott, Ont., informed The Leader-Post he has in his possession a picture of a man named "Slim" who did a remarkable piece of driving in 1923.

Mr. Kingston says this man lived at Vulcan, Sask. He means Vulcan, Alta., as there is no known Vulcan post office or district in Saskatchewan. "Slim" was not far from MacLeod, Alta.

This man "Slim," says Mr. Kingston, with a hitch of 30 horses, drawing nine "tanks" (wheat wagons) containing 1,140 bushels of wheat, drove a mile into Vulcan to deliver the grain at an elevator. Mr. Kingston has a picture of the horses and wagons filled with wheat, taken just before the grain was put into the elevator.

At the time, western papers had record of the feat and called it the "championship" feat, never before attempted and not likely to be equalled.

The following year a tractor drawn wagonage of wheat to Lethbridge exceeded the bushelage drawn by "Slim" but, so many years ago, in the western wheatlands, no other 30-horse team has ever performed the feat of "Slim" in 1923.

Good Weather Prophet

Nervous Dog Can Sense Storm Coming From Great Distance

Henry E. Hathaway, meteorologist, disclosed that one of the Hartford, Conn., Weather Bureau's best bets for discovering an approaching thunderstorm is a nervous dog. Puzzled because the first thunderclap was always reported from the Blue Hills section, Mr. Hathaway started asking questions. He found that an observer's dog heard distant thunder long before human ears, notified his master by a "peculiar bark" and dashed to the doghouse to stay until the storm passed.

Average life of a butterfly is five weeks. Some live 10 weeks, some only a few days, and many are unable to eat during their short life span.

Used as hay and silage in the United States, millet is used by one-third of the world to make four for their daily bread.

Wine is gradually replacing "Vodka" as Russia's favorite drink.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by **DR. J. W. S. McCULLOUGH**
A LEMON A DAY

Scurvy was rampant in the Abyssinian army on the Somaliland front. This disease contributed materially to the defeat of the Ethiopians. Reports of foreign doctors in the Ethiopian Red Cross tell of 30,000 cases. There was no scurvy in the Italian army. What was the reason for this immunity? A small precaution; every soldier in Mussolini's army was given a lemon a day. Like the vitamin apple, a lemon a day kept the doctor away. Since the earliest times scurvy has frequently proved a scourge to explorers, to sailors, armies and to the civil population in areas where fresh food could not be had.

Scurvy is due to the diet being deficient in Vitamin C. The victim of this affection feels tired, has pains in the joints; the gums swell and bleed. Later on the skin becomes covered with petechiae which are small spots due to effusion of blood. Haemorrhage follows and the person may secure same by writing to: The health of her baby, gives the infant orange and other fruit juices for milk contains very little of Vitamin C. In consequence little is heard or seen of scurvy at the present time. It is one of the disappearing diseases.

The use of fresh vegetables and fruits prevents and cures scurvy. James Cook, one of the immortal explorers and sailors of Great Britain, was a pioneer in the use of fresh workers. He forced his crews at the rope's end to drink soup made from wild vegetables. He set them a good example by his personal use of raw fruits, wild celery and other green stuff found in his extensive travels.

To-day the mother, zealous for the health of her baby, gives the infant orange and other fruit juices for milk contains very little of Vitamin C. In consequence little is heard or seen of scurvy at the present time. It is one of the disappearing diseases.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer essays, or the book "The Health League of Canada, 105 Bond St., Toronto, Ont.

Won Major Awards

Clydesdales From British Columbia Swept Boards At San Francisco

Most of the honors for horses in the Clydesdale classes recently awarded at the Golden Gate Exposition, San Francisco, were won by British Columbia-bred Clydesdales. From among 70 head of horses, the exhibits of well-known Clydesdale breeders from all parts of North America, the British Columbia contingent of 15 horses practically swept the board in prizes. Ten of these horses, four of them young stallions, came from the Dominion Experimental Farm at Agassiz; the other five were natives belonging to the Colony Farm at Essandale, B.C.

The entire British Columbia exhibit of Clydesdales was shipped to the exhibition under the auspices of the B.C. Horse Breeders' Association under the direct care of W. H. Hicks, Superintendent, Dominion Experimental Farm, Agassiz, and Secretary of the Association.

A Good Suggestion

Tells How To Avoid Common Accident In The Dark

Did you ever bump into an open door while groping for it in the dark with outstretched arms? Next time cross your arms in front and the door cannot pass between them to come in contact with the face or head. Locating with one hand a drop cord or other small object overhead often seems hopeless, but success comes in knowing how. Simply place the thumbs together and spread the fingers widely apart and see how easy it is to cover an area four times greater than when one hand is used.—Popular Mechanics.

An Unusual Photograph

The world's longest range photograph was taken of Mt. Shasta from an elevation of 23,000 feet and a distance of 331 miles by a captain in the U.S. army air corps. The photo covered the greatest amount of earth's surface ever taken at a single exposure.

The 3,000-foot cliff El Capitan in Yosemite Valley is called the world's biggest piece of unfractured granite.

35% STRONGER ... **Extra Strength** means **Extra Safety**

FIRESTONE Champion Tires are sweeping aside all performance records. They're the greatest tires Firestone ever built—the only tire with all these advantages:

SAFETY-LOCK CORDS—an entirely new method of tire building—35% stronger.

CHAMPION TIRES

THE RIVER OF SKULLS

CHAPTER III.—Continued

As his eyes swept the two men Alan was thinking hard. Why did these men wish to go to the headwaters?

"Dessane says you're just the man we want, but we didn't expect to see you for weeks yet," the stranger was saying, as he shook Alan's hand. "My name is McQueen, James McQueen. Shake hands with Tom Slade, my partner. We want to have a talk with you."

Surprised by the situation which had so swiftly developed, Alan stared hard at the men who stood before him. What could these people from the "outside" want up the river? Were they prospectors? Then the picture of a giant blocking the doorway of a cabin to two starving men flashed across his memory.

"When can you start back with you?" abruptly demanded McQueen. Alan's eye caught Noel's inscrutable look as he yawned, shrugged his wide shoulders and retorted: "Mr. McQueen, I'm not starting back with you."

McQueen turned and engaged Rivard and Slade in conversation while Alan walked to the trade-counter where his friend Pierre awaited him with a wink of approval. Alan asked for tobacco. As he opened his skin pouch to hold the plug, a folded five-dollar bill slipped to the floor.

In a flash, Alan's moccasin covered it. Dropping the plug beside his moccasin, he bent over and scooped bill and tobacco from the floor with the same movement of the hand and put them in his pouch. But his body shook with the pounding of his heart.

Had the bill been seen by Rivard and the others standing in whispered conversation at the door? Noel considered the conversation. Later, when the sound of voices outside the trade-counter, answering in monosyllables as the voluble Pierre chattered, heard the door close behind him.

"Are these people going to supper with Rivard at Dessane's?" he asked Pierre.

"Yes."

"Then I can't see Berthe until they are through?"

"No. Wait until they come back here afraid dry eat, den you can see her alone, eh? She help her modder and de cook, now?"

"That will make us late to eat with you."

"No, no! Julie, she be so glad to see you, Alan, she cook all night for to feed you," laughed Pierre. "You come attair you see Berthe. I go ova'r and tell her now."

When the door of the trade-room closed behind Pierre, Noel turned to Alan. "Why you drop dat money?"

"I've done it, Noel," groaned the other. "I forgot I had that bill in my pouch when I got the tobacco."

"Mebbe dey not see eet," comforted Noel.

"They saw it; they couldn't help it! Pierre didn't see from where he stood but Rivard and the others—they saw."

"Dey spik together, mebbe dey not see."

A folded five-dollar bill slipped to the floor.

"If they did see it, how am I going to account for it? They'll learn that I drew no money here last summer—never touched my balance with Gabriel or the Hudson's Bay. Nobody takes money into the bush so they're bound to suspect we met somebody. He trusted me and this is how I repay him."

The return of Pierre from his cabin interrupted the conversation. Later, when the sound of voices outside the trade-house announced the return of Dessane and the strangers from sup-

per, Alan slipped out of a rear door and went to the factor's house. A black-eyed mite of a girl opened the door to his knock and, with a shriek of joy, threw herself at the returned wanderer who caught and tossed her high in his arms.

"Petite Maman! What a great girl she has grown!" he cried, as the delighted child clung to him. "All winter long Alan has missed his playmate and wondered if she ever thought of him far away in the snow."

"Alee, Alee!" laughed the child. "We all miss Alee! Berthe she miss him too, but Arsene, he try to make her not miss him. How is Roughy?"

"Oh, Roughy's fine."

Kissing her on each of her brown cheeks as he held her in his arms, Alan suddenly reddened with self-consciousness. Smiling in amusement at the man and child, in an inner room stood a girl of eighteen with large dark eyes and a wealth of blue-black hair.

"Welcome, M'sieu le voyageur!" Berthe Dessane ran to him and impulsively grasped his hands. Her straight, thick brows met for an instant in a frown as she noted the leanness of his face. "Oh, but you've not taken care of yourself, Alan, as you promised!" she protested. "You look tired and thin."

He laughed at her solicitude over his leanness. "We haven't starved, Berthe. I'm going to Pierre's for supper."

"Oh, I'm so glad," she said with relief. Then her face suddenly sobered. She sent her little sister protesting from the room, closed the door and returned to the puzzled Cameron.

"Arsene saw you drop some money in the trade-room," she whispered. "I overheard him tell father just now at supper. They have gone to the trade-house to talk with the police."

Police! The bronzed features of Alan Cameron went slowly gray. He suddenly felt weak and cold. These strangers who had arrived only the day before and of whose presence Duncan McNab, at the Hudson's Bay Company, seemed to have no knowledge; these men who wanted to go to the head of the river were government men—Provincial Police! So Rivard had seen him drop that bill! And how was he to explain it? "Alan, what is the matter?" Berthe demanded, shocked by his stricken face.

"Nothing, nothing at all!" With an effort he regained his self-possession. "That's a good joke on Rivard," he continued, forcing a laugh. "I've had that money in my pouch two years—got it at Whale River when I went with the goose herder that fall."

"I'm glad, Alan. Arsene was so mysterious with father, I wanted you to know because—he does not like you."

Seizing her by the shoulders Alan searched her dark eyes. "Do you still like me?" he demanded. "Has Arsene changed you?"

The long-lashed lids of her black eyes winked hard as she smiled back at him. "You know I do—Alan. I'm so glad—you've come back—so early."

"Thanks for what you told me, Berthe! I'm going to Pierre's house—for supper," he said at the door.

No, he reassured himself, as he walked away through the wet snow, Rivard hadn't poisoned her mind yet.

Over the hot supper at Pierre's the two boys talked with their host of the winter on the headwaters. "Pierre," said Alan, at length, as he pushed back his chair and lit his pipe, "what are my friend and will tell me. You did Rivard say when he came back with those strangers to the trade-counter?"

A smile lit the broad face of the head voyager. His small eyes twinkled as he answered: "He pull dose police ova'r een de corner and whisper. He know Pierre een your fren'."

"So they're Provincial Police from Quebec? Who are they after?"

Pierre shrugged. "I do not know; M'sieu Dessane tell dem you know de headwater country, you and Noel, so dey want you to guide dem."

"How did they get here?"

"Yesterday dey come een ova'r de shore ice by dog-team. Dey got two half-breed wild dem—bad lookin' feller."

"And Gabriel told them I was the man they wanted?"

"Ah-hah, dey say dey pay you well to guide dem."

"Well, Pierre, Noel and I are going up the coast for dogs. They'd better get someone else for a guide. I might lose the way."

Back in his own house at the Hudson's Bay settlement, Alan and Noel considered the situation.

Suddenly the great dog lying at their feet lifted his head. His throat swelled in a low rumble as he stalked to the door on stiff legs and sniffed at the crack. The eyes of the two men met as they nodded significantly. Shortly there were low voices outside which were answered by the sniffing dog with a snarl.

KEEPS OUTSIDE CLOSETS Clean And Sanitary!

THERE'S no risk of offensive outdoor odors when you use Gillett's Pure Flake Lye regularly. Just sprinkle half a tin over contents of closet—once a week. There's no need to remove contents—Gillett's does it for you.

Gillett's Lye in the household saves hours of heavy work—clears clogged drains, scours dirty pots and pans, quickly cuts through grease. Keep a tin handy.

"Never dissolve lye in hot water, the action of the lye heats the water."

FREE BOOKLET—The Gillett's Lye booklet tells how this powerful cleanser clears clogged drains, keeps outdoor closets clean and odorless by destroying all odors of decay. It also shows how to remove stains from carpets, floors, and walls. Send for a copy today! Enclose 10¢ in stamps. Write to: Gillett's Lye, 1000 Main Street, Toronto, Ont.

There was a knock and a voice called:

"The up that man-eating husky, will you?"

Alan ordered Rough to lie down in a corner of the room, then opened the door. McQueen and Slade entered, carrying furtive glances around the room for the dog.

"I don't like that dog," said McQueen. "Put him outside, will you? He might jump on us."

"Yes, he might. He's a good judge of men—that dog."

Alan realized that he was going pretty far. These men were Provincial Police, with wide powers. But they had not as yet identified themselves to him, and he had excuse for his actions. He opened the door and let Rough out.

(To Be Continued)

Boy Has Strange Trait

Can Reproduce Talk Of Others Simultaneously With Speaker

Nineteen-year-old Francis Manger had seized upon his own involuntary knack of taking words out of people's mouths.

"I'm stumped," admitted Dr. Carleton Scofield, professor of psychology at the University of Buffalo, after testing the youth with classic questions, scientific tongue twisters and even foreign languages.

"This boy reproduces the talk of others without a perceptible time interval between words of the speaker and his own," Dr. Scofield added.

To Manger himself, the strange trait is just as much a puzzle. "I found it out by accident two years ago," he said.

Dr. Scofield began his experiment by putting the youth through a series of tests involving complicated neurological terms. Manger responded without hesitation.

"I'll now recite a few lines of poetry," the psychologist said. He began: "Hence loathed melancholy" and Manger, picking him up with the youth's classic questions, scientific tongue twisters and even foreign languages.

"This boy reproduces the talk of others without a perceptible time interval between words of the speaker and his own," Dr. Scofield added.

Afraid Of Busy Streets

New York Terrifies Man Who Has Wandered Jungles Alone

Associated Press staff writer tells this story: One wouldn't think that a man who has wandered the African and South American jungles alone for five years would be afraid of anything—but Otto Reichsfeld is. He's afraid of the busy New York streets and Manhattan's towering buildings.

The 29-year-old Austrian who gave up his journalistic work in Vienna five years ago to see the world, exclaimed: "These buildings! They frighten me, and the streets—"

Reichsfeld returned last month from South America where he penetrated the jungle fastness of Brazil's Matta Grosso in a desire to solve the fate of Colonel P. H. Fawcett, British explorer who went into the brush and never returned.

He convinced himself Colonel Fawcett was dead and not living in a small village in the interior as had been rumored. Reichsfeld said that native Indians found Colonel Fawcett's rifle, that he saw it and he believes the Briton, his son, Jack Fawcett, and Roxor Rimell, who was with them, were killed by cannibals.

Reichsfeld is bubbling over with tales of hair-raising adventures, but the tops seem to be his experience with blood-drinking Africans whose chief saved him from death after Reichsfeld uttered a few words in Arabic just as he was about to be slain.

The tribe seized him and he was bound to a tree. Reichsfeld pleaded for his life in all the eight languages he speaks, but to no avail.

Then in an inspiration he spoke the Arabic words which mean: "You don't understand? Allah is merciful."

The tribal chieftain, Reichsfeld related, understood the word "Allah" and thought the white visitor had come from God. He was released, presented the chief with a pipe and some tobacco and lived with the tribe for weeks.

He said the members of that particular tribe drink the blood of white men, believing that it gives them extraordinary powers.

Puzzle For Attorney

Law Says Dog Must Sign For Letter Announcing Legacy

The law says a little lapdog named Flossie must accept a registered letter and sign for it, but doesn't say how.

John Bouse, registrar of wills in Baltimore, prepared to toss the Flossie cause before into the lap of State's Attorney William Walsh for a decision.

Flossie was the devoted companion of Mrs. Mary Herman, who died and in her will set up a \$2,000 trust fund to ensure the care of her pet.

But Maryland probate law specifies the registrar of wills must advise any legatee by registered mail of the legacy, and the legatee must sign.

Bouse can think of only two solutions: maybe a guardian can be appointed with powers to sign for Flossie's mandatory mail, or Flossie's paw-print on the receipt may be accepted for her "X".

Flossie is living with friends until her dog-biscuit funds come out of litigation.

No Royal Train Available

Variable Railway Gauges In Australia Make It Impossible

No Royal train will be available to the Duke and Duchess of Kent because of variable railway gauges. Queensland and Tasmania have three feet, six inches. New South Wales four feet, eight inches, and Victoria, five feet, six inches. Western Australia has two of these widths and South Australia has all three.

Therefore special trains will be made up in each State and everywhere they go they will be preceded by pilot trains. Precautions not usual when Governors-General travel will be taken, such as special guards on crossings and bridges, and the suspension of shunting.

It will not be possible to add special coaches to Victoria's streamlined, air-conditioned flyers-de-luxe which handle the inter-capital traffic, but if it is desired to use them, sections will be reserved and on the Duke will be conferred the Freedom of the Footplate if he desires the thrill of some really fast driving—Australian Press Union.

Everybody Puzzled

Have you heard the one about the widow and the inquest?

Well, after the coroner had asked a lot of questions he said to her, "On reviewing the evidence I am bound to bring in a verdict of death from unknown causes."

"That's right," she said. "I still don't know just why I gave him poison."

Taste Thrilling Recipe for Chocolate Pudding

(Note: When used chilled, this dessert may be unmolded.)

Combine 3½ tablespoons Durham Corn Starch very thoroughly with ½ cup granulated sugar, ¼ cup cocoa and ¼ teaspoon salt. Slowly stir in 3 cups hot milk; return to double boiler and stir and cook until mixture thickens. Cover and cook, with occasional stirring, until no raw flavor remains. Remove from heat, add ½ teaspoon vanilla and cool slightly. Turn into wet moulds or dessert glasses. Serve cold with cream, plain or whipped. Nutmegs (toasted when suitable), coconut or canned peaches, pears or apricots are delicious with this dessert.

DURHAM STARCH Saves You Money!

Art Of Distilling Perfume Was Known In Ancient Times

The art of capturing and storing the lovely perfume of flowers and fruits is ages old, and world-wide, says a writer in the British Woman's Magazine. The ancient Egyptians, the Greeks, the Romans and the Arabs all practised the distilling of perfume from sweet-smelling things.

Alcoholic perfumes were produced in the fourteenth century, and the first of its kind that we hear of was called Hungary Water. This was distilled from rosemary. Queen Elizabeth of Hungary obtained the recipe for the distilling of this water from a hermit, and by using it she is said to have preserved her beauty to an old age.

Ornament and perfume rejoice the heart.

When Catharine de Medici visited France, she was accompanied by Renée, a famous Florentine perfumer, and since then the French have made great progress in the art.

The strewing of sweet-smelling herbs in the linen chest and the hanging of scented sachets in the clothes' closet have been the practice of the careful housewife for many years.

The Psalmist says: All thy garments smelt of myrrh and aloes and cassia.

While Proverbs we read: The king perfumed my bed with myrrh, aloes and cinnamon.

Myrrh is a gum resin which exudes from a shrub grown in Arabia and Abyssinia, and on being distilled with water produces a volatile oil.

Lavender, grown principally in Mitcham, has made English lavender water famous the world over. That other popular perfume, Eau de Cologne, was made in Cologne by an Italian named Johann Maria Farina, who settled there in 1709.

Some of the perfume other than flowers and herbs are bark of trees, fruits, and secretions from some animals. Ambergris, for instance, is taken from the sperm-whale. Camphor is extracted from trees of the laurel group that grow in China and the islands of the East Indies. Orange, citron and bergamot are among the fruits that furnish fragrance for the perfumer's art.

Planet Named Danzig

The German Astronomical Society announced that planet No. 1,419, an asteroid, would bear the name "Danzig". The wish was expressed that the Free City "may always stand under a lucky star." The discovery of "Danzig", one of the minor planets, has been attributed to Dr. Reinhold Heideberg.

A half-ton load can easily be carried by a two-humped camel.

Local News

Mrs. J. Wilson was a week-end visitor at Lethbridge.

Miss Nora Easton has been appointed teacher at a school near Wetaskiwin, Alta.

Mrs. Harry Mosher of Lethbridge was the guest of Mr. and Mrs. Hugh Dunlop this week.

Miss Pearl McDonald returned to Calgary this week after spending two weeks holidays with her parents.

Laura Antel and Peggy Devine spent five weeks at the Gap, and enjoyed the outing. Peggy was down on holidays from Cadomin, Alta.

Haysom's Drug Store announces that it is now the Pensar agency in the Crow's Nest Pass and attention is directed to the advertisement in this issue.

Constable S. J. Connors, R.C.M.P. who was previously stationed at the Blairmore detachment, has been transferred from Medicine Hat to Coutts.

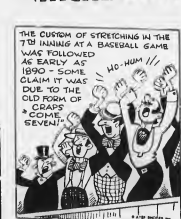

Mrs. Walter Williams and daughters returned this week from Calgary, Mr. Williams remains there taking treatment for an injury to his leg received several months ago.

"A Bulletin for Every Home" is the slogan for the free distribution tabloid sheet issued by The Journal. Fine typography and clearly printed, these qualities give prestige to merchants' advertising.

Taking collections at games where no admission fee is charged results in an awful lot of big nickles being dropped into the hat. The baseball club deserves support to a more liberal extent than just that.

Excessive speeding on roads in town causes unnecessary wear, and is dangerous to pedestrians. A moderate speed is easier on cars and roads. The "Slow" signs near the tennis courts should be more closely observed, as the crossing there is used by many pedestrians, including school children. Don't be a hog behind a steering wheel.

SPORT HIGHLIGHTS

It is our custom to depend upon the maintenance of high quality and low prices, to make our customers satisfied!

Where It Costs Less To Be Better Dressed

Mrs. Robert Evans of Calgary was a visitor at the home of Mr. and Mrs. T. Higginbotham last week.

Miss Rita Ash, before leaving to commence teaching school at Beaver Lodge, Alta., was on Tuesday afternoon honored by her friends, who met at Miss Mary Graham's on Victoria Avenue, and presented her with an overnight travelling case.

Mr. and Mrs. T. Holstead and Audrey, and Mr. and Mrs. T. Brown of Spring Point, on a motor tour last week called on Mr. and Mrs. Ernest F. Gare at

Trochu, and found them in good health. From 1922 to 1927 Mr. Gare was publisher of The Journal, and settled at Trochu in 1935.

Miss Margaret Allan and J. Allan jr. returned on Thursday from a visit to New York World's Fair. Miss Allan took a course in French at McGill during the summer vacation. Their visit to the Fair proved highly interesting, and they viewed with keen interest the exhibits of the various nations of the world.

The Journal acknowledges a kindly letter from Mr. O. E. S.

Whiteside, former general manager of International mine who with Mrs. Whiteside has been living in Vancouver for a considerable time, though his home address is still at Sarnia, Ontario

"Four Feathers" is coming to the Palace, and is a production based on the British Army's campaigns in the Sudan in 1885 and 1896. The acting is superb, and throughout the play is a fine portrayal of the British Tommy as a soldier and a man. You'll really enjoy it.

Mr. and Mrs. R. Holmes will leave on Saturday for two weeks holiday at Trail and Nelson.
